## WHAT'S IN YOUR ATTIC?

At Anti-Pesto, we work hard to provide innovative solutions to care for your home environment. Meeting this objective is the newest member of our service menu - **T-A-P™ Pest Control Insulation**, the only EnergyStar labeled pesticide on the market. Not only will it control a wide variety of pests, but it helps reduce your energy costs, makes your home quieter, and may even help you reduce your federal income tax bite! This unique product combines the superior insulating qualities of cellulose insulation with the pest controlling properties of low-toxicity borates. **T-A-P™** outperforms traditional insulation, and when blown into your attic it forms a blanket over existing insulation, providing an effective barrier to pest entry while making your home more comfortable. And it never needs re-treating! It's there, controlling insects, for the life of your home!

Attesting to our concern for

this community's environment, Pest Control Insulation is manufactured from 87.5% recycled newsprint, diverting a significant amount of waste paper that would otherwise be headed to already bulging landfills.

Here's what you can expect after adding this unique patented product to your attic:

- Pest Control - All-natural Boric Acid is deadly to bugs and is acceptable for use around humans and pets
- Energy Savings - Reduce your utility bills
- Comfort - Stay cool in the summer and warm in the winter
- Sound Absorption - Reduces outside noise
- Fire Safety - Provides flame and smolder combustion resistance
- Environmentally Responsible - Made from 87.5% recycled newsprint
- Blown-in - For a perfect fit in your attic, covering all the nooks and crannies
- Maybe even a \$1,500.00 maximum tax credit on your 2010 from 1040!

**T-A-P™** insulation blown into an attic

The U.S. Department of Energy currently advises that attics in our area be insulated to an R-49 for maximum energy efficiency. Since nearly every home falls short of that standard, we recommend that an Anti-Pesto representative visit your home soon to discuss the advantages of having your attic capped with **T-A-P™!** Call us today! More information is available at [www.TAPinsulation.com](http://www.TAPinsulation.com).

## Meet Alyssa our Little Minion

Alyssa is our summer time helper and little minion. She was accepted to USF and will be attending this fall. She has not decided on a major yet...lots of time to think about what she wants to do with her young self. Although USF is only across the big pond she will be on her own for the first time and

can't wait! The bummer is she won't be able to pick on her younger brother Chris or hang out as much with her BFF Emily. But, she will be able to call Dad when she needs some extra cash.

Alyssa loves the Ray's, especially Carlos Pena and John Jayso. We have a photo

of her and Carlos Pena here in the office, she met him last year during the All Star picks.

Alyssa also likes to paint by numbers, the theater, musicals and loves "Glee." Hmm perhaps she should try Performing Arts as a major! We wish our little minion the best of everything yet to come.
